SUMMARY

BTech CSE student at VIT Vellore (CGPA 9.28) with production experience building full-stack systems, AI pipelines, and enterprise software. Developer at iFocus Systec working on AI tooling and multi-tenant SaaS. Manage operations, franchising, and technology at SRS Learning Center. JEE 96th percentile, hackathon finalist, and ideathon winner.

EXPERIENCE

iFocus Systec — Developer (AI & Developer Tooling) | Bangalore

- Studied QwikHire ATS codebase (multi-tenant B2B SaaS with AI interviews), documenting WebSockets, multi-tenancy, auth, billing, and infrastructure from first principles.
- Designed an AI job description generation pipeline for QwikHire; selected GPT-OSS 20B and 120B after multi-model comparison testing across oracle correctness, automation-readiness, and security scenario handling.
- Built and shipped TicketZilla, a full-stack IT helpdesk system (React/TypeScript, NestJS, FastAPI, PostgreSQL, Redis, BullMQ). Deployed and used internally by 300+ employees.

ElectraCode — Contract Developer | Bangalore

- Built a School ERP for government residential schools in Karnataka, expanding scope from inventory management to admissions, attendance, timetables, faculty management, and health records. Project is being expanded pan-Karnataka.

SRS Learning Center — Operations & Technology | Bengaluru

srsedutech.com

Manage day-to-day school operations including scheduling, staff coordination, vendor management, and student administration across preschool, K-12 tuition, and IIT foundation coaching programs.

- Lead franchising and business development — evaluating partnerships, managing agreements, and driving expansion of the learning center model.
- Deliver guest lectures for JEE aspirants covering problem-solving strategies and subject fundamentals.
- Built and manage the school website (srsedutech.com) and integrated StaffRoom, a teacher recruitment portal(https://staffroom-three.vercel.app/) to streamline hiring directly from the platform.
- Automate administrative workflows and internal processes to reduce manual effort across the center's operations.

PROJECTS

TicketZilla | *React/TypeScript · NestJS · FastAPI · PostgreSQL · Redis · BullMQ*

- Internal IT helpdesk and support ticket system with role-based access control, an IT_ADMIN approval workflow, async task queuing via BullMQ, and structured ticket lifecycle management. Built for and deployed at iFocus Systec.

RetailOS | *FastAPI · DuckDB · Next.js · Docker · JWT*

- Retail analytics system with star-schema warehouse, incremental ETL pipelines, and automated stockout prediction with reorder recommendations. DevSpace 54-hour hackathon sponsored track finalist.

GridForge | *FastAPI · Redis · Docker · React · Tailwind CSS*

- Distributed task scheduling platform dispatching Python to remote workers via Redis-backed CPU/GPU queues. Isolated Docker execution with PyTorch/CUDA support and a real-time monitoring dashboard.

SchoolSync + StaffRoom | *Next.js · Prisma · PostgreSQL · Tailwind · shadcn/ui · NextAuth*

- SchoolSync: Full-featured school management PWA handling student records, fee collection, attendance tracking, homework assignments, academic calendars, photo galleries, report cards, and timetable scheduling.
- StaffRoom: Teacher recruitment marketplace connecting schools with teachers via job listings, candidate profiles, and matching. Live at srs-phi-green.vercel.app.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, C++, Java **Frameworks:** FastAPI, Next.js, React, NestJS, Prisma, Tailwind CSS
Infrastructure: Docker, Redis, PostgreSQL, MongoDB, DuckDB, BullMQ, Git, Vercel **Concepts:** Distributed systems, ETL, multi-tenancy, AI/LLM evaluation, DSA

EDUCATION

VIT Vellore University — BTech CSE | CGPA: 9.28 | 2024–2028
New Baldwins International — 12th CBSE | 90% | JEE Mains 96th Percentile | 2023–2024
Narayana Public School — 10th CBSE | 96% | 2021–2022

ACHIEVEMENTS

Startup Street 9.0 — 1st Prize (Ideathon): Proposed a UV-based inspection device to detect used clothing in retail return workflows. Presented feasibility, strategy, and business impact.
DevSpace 54-Hour Hackathon — Sponsored Track Finalist: Built RetailOS end-to-end with ETL pipelines, star-schema warehouse, and live KPI dashboards.

EXTRA-CURRICULAR

- Toastmasters International — Treasurer: Managed club finances, budgeting, and event fund allocation. Active speaker in Table Topics and prepared speeches.
- 25km BMF Ultra Trail Run — completed a demanding off-road ultra trail race.
- ACM — VIT Student Chapter: Active member in technical workshops, coding contests, and event organizing.
